Keith and team,

I want to most sincerely thank you all for making the trip to Savannah. This was a very inspiring experience for all. We appreciate your knowledge passion for the area, and focus on the not-for-profit challenges we address on every day.

It is important to highlight the service excellence and quality a non-profit delivers, especially in a world that is predominately hospice for-profit. Through the lens of this documentary, it is a pleasure to spotlight what makes our version of hospice so very unique and superior in care. Each day we face a different risk – from audit to competitor, and now global pandemic; thus, it is so refreshing to be able to share and recall the reason we fight for relevance every day. We are the community base and the heart of the historical mission that roots the hospice philosophy; I appreciate your team telling that story with your creative intelligence and artful message.

Thank you for sharing with me all of your excellent work. Please know in your journey to teach and inspire, if you ever need my help on participation in more of your work, it was truly a pleasure.

Sincerely,

A handwritten signature in cursive script that reads "Kathleen D. Benton".
